

# Conformity Confirmation

the balancing of CO<sub>2</sub> emissions from the

**GASAG Solution Plus GmbH**

based in

EUREF-Campus 23-24, 10829 Berlin

for the location:

Gebäudekomplex EUREF Campus, EUREF Campus 9 and 23-24, 10829 Berlin

in the period from

01/01/2020 until 31/12/2022

with the requirements of the

Annex 9 to the framework agreement dated 3 July 2013 between GASAG Solution Plus GmbH and DENKMALplus Beteiligungsgesellschaft mbH & Co. Erste Berlin KG.

After reviewing the relevant verification documents and checking the contractually agreed calculation methodology, the following CO<sub>2</sub> emissions for the reporting years 2020-2022 can be confirmed:

<b>emissions in tonnes per year</b>	<b>2020</b>	<b>2021</b>	<b>2022</b>
<b>CO<sub>2</sub> from purchased energy:</b>	931.7	1.081.5	882.2
<b>CO<sub>2</sub> from electricity credits:</b>	-1.584.4	-1.955.0	-1.762.6
<b>Balance sheet:</b>	-652.7	-873.5	-880.4

The CO<sub>2</sub> emissions calculated in accordance with the above-mentioned requirements are well below 0, which means that proof has been provided in accordance with the contractual agreements.

The calculation methodology is based exclusively on the assumptions of the framework agreement. The negative CO<sub>2</sub> emissions do not qualify for compensation or other offsetting within the normative requirements for greenhouse gas balancing.

The document is based on the test report with the no. C-23-10780

Berlin, 15 January 2024
